DA 331 — Big Data

Tanish Anand — 240150037
Tumu Sai Seshi Kiran — 240150038

Individual Contributions

Tanish Anand (240150037)

We jointly defined the research question and worked out the motivation for the project. I independently handled the processing of the UMLS knowledge graph, and we worked together on the entity linking and fact retrieval components. I was primarily responsible for the large language model experiments, which involved setting up and running the experiments and analysing the resulting predictions. We carried out the analysis of results and the diagnostic study jointly. I also prepared the project report.

Tumu Sai Seshi Kiran (240150038)

We jointly defined the research question and worked out the motivation for the project. I independently handled the processing of the PrimeKG knowledge graph, and we worked together on the entity linking and fact retrieval components. I was primarily responsible for the classical machine learning experiments. We carried out the analysis of results and the diagnostic study jointly. I also prepared the project presentation.
